THE WORLD**

INTERNATIONAL NETWORK IN NUMBERS

People are stepping up to lead social and environmental change all over the world. We are all learning at each stage of our journey.

SOCIAL CHANGE

Solving the world's problems needs all of us working at every level and in every community.

OUR VISION

Societies combining economic activity with community benefit, led by dynamic social entrepreneurs wherever we may find them.

OUR ROLE

We support the people that make change happen to help them 'turn up as their best selves'. We do this through learning and development programmes focussed on:

LEADERSHIP | ENTERPRISE | SOCIAL IMPACT | LEARNING

Responding to demand to replicate, since 2012 the Social Enterprise Academy has developed a social licence model, building a network of partners to support people leading social change, and the next generation, with learning and development. Since 2004, we have reached over 15,000 learners globally.

STRENGTHENING ECOSYSTEMS

As part of the support ecosystem in any country, Social Enterprise Academy teams add accredited practice based learning and development opportunities not only for social entrepreneurs, but for leaders of social change at all levels, their teams, and organisations at any stage of growth.

Drawing on the 15 year track record in Scotland, local adaptation and innovation with a growing global team is building the strength of the social enterprise movement to support itself. In 2018, 12 country teams are in development.

Since 2004

SUSTAINABLE SOLUTIONS

We are part of the growing infrastructure to support social enterprise and those working for social change around the world. Now with a global footprint, the Academy is helping to play a part in the leadership of social enterprise support ecosystems in each country, creating sustainable social enterprise models for local and global resilience.

The social license is based on principles of shared responsibility, shared risk and shared value, and includes:

Our ambition is to support Hub teams to operate a sustainable business model, with a resilient income mix.

SEA Hub Network 2018 turnover: £1,822,242

PARTNERSHIP & COMMUNITY DEVELOPMENT

Every Hub is co-developed with a partner embedded in the local community and social enterprise ecosystem. SEA International CIC works closely with partners to develop a local Learning Facilitator network of social entrepreneurs and specialists able to deliver learning programmes in their communities.

New programmes and innovations developed by local Hubs are shared back across the network with quality and accreditation through our 'Learning Lab' in Scotland. Each partner is adding their own specialism and experience to the international network.
